ANNEXURE-A:

Technical Specifications

Combo Device (Tablet with built in Biometric Device) for Biometric Attendance System (Minimum Technical Specifications & Requirements) Quantity: 3,000	
Operating System	Android 4.2, Jelly Bean or Higher
CPU	1.3 GHz Quad Core or Higher
Phone Option	Mandatory
Screen Size	7 Inch or Higher
Screen Resolution	1024*600 or Higher
Internal Memory	4 GB or Higher
Expandable Memory	32 GB Card to be provided with Tab
Warranty	1 Year Manufacturer Warranty
SIM	Yes
Battery	2000mAH or Higher
RAM	2 GB or Higher
Internet	Yes
GPS	GPS/AGPS
4G/3G/2G	Yes
GPRS/EDGE	Yes
WAP/MMS	Yes
WLAN	Yes
Bluetooth	Yes
WIFI	Yes
USB Port for Charging, Data Transfer	Yes (Host Connectivity), Power Supply via USB Connection/Direct Electricity
Bio Metric Device	High Quality, rugged, optical/capacitive sensor or higher fingerprint sensor with 500 DPI resolution, Should be able to work well with dry, moist and rough fingerprints (Preference will be given to higher Finger Print Scanner)
	Automated sleep and wake up (upon sensing fingerprint) functionality
	Image Resolution 500DPI
	Image Size 300 x 400 pixels
	Platen Size 16.1mm x 18.2mm
	Effective Sensing Area 12.7mm x 14.9mm

Technical Description:

- The system/device should have the capability to communicate automated health-check alerts.
- Auto failover to / from primary / secondary communication medium in case of failure.

- Indoor placement of device with requisite caging, screen protector and body cover for physical security. Ease of use must also be given priority
- Application Lock will be required, as if specific software related to Attendance Management could be used/operational

Brief Implementation Scope and other Requirements:

PITB intends to implement “IT Intervention for Health Sector Reforms” across Punjab province in various Health units at Rural Health Centre (RHC) level and Basic Health Unit (BHU) level. The centralized Biometric Attendance System is proposed to enhance efficiency via real-time monitoring over the web. The biometric devices will be installed in Basic Health Units (BHU’s) and Rural Health Centers (RHC’s) in Punjab. Following is the brief scope of work:

System will be comprised of Combo Tablet Device (Tablet with Built-in Biometric Device) as attached to power socket for continuous/minimum charging.

- Attendance will be marked using biometric verification system
- System will have the provision to enroll employees as an ongoing process
- Auto and scheduled update of transactional history in centralized databases
- Backend monitoring system will be customizable and flexible enough to cater time-to-time client requirements
- Proprietary/non-proprietary encryption support during client/server communication
- The vendor will provide biometric device based complete attendance system
- The system software part should include both client side and server side components
- The vendor will be responsible for complete customization of both client and server side applications to meet attendance requirements and rosters of BHUs & RHCs
- System should be able to support at least 3000 concurrent users & Sessions
- System shall provide a Unique User Id and shall provide necessary feature for user management including password management etc.
- Application’s Technical Documentation / Manual for usage of the controls, design and operations.
- Employee registration on installed biometric devices.
- Comprehensive onsite training will be provided to all users on installed system(s) subject to the prior approval.
- Health Department, Govt. of the Punjab and PITB, Govt. of the Punjab Logo to be in print on the Tablet and Portable Biometric Device, etc.
- Vendor will also provide User Manuals/Documents for using device at each location (RHC & BHU)
- Contractor will provide 4G/3G/2G enabled SIM’s for data transfer/connectivity and SIM’s should be operational at all times, in case there is no network (4G/3G/2G) available then alternative mechanism should be provided by the vendor for each location where device is installed
- Priority is to 3G network, where 3G is available it should be provided
- System should also show Active/Inactive SIMs and data usage per location (RHC & BHU)

- In demo the vendor will give one sample of complete system to PITB for evaluation (Type A Testing) and PITB will verify development environment of the system for future extensions
- Both Hardware and Software should have the provision to run other applications as well
- Contractor shall also share technical or any other documentation of Software with PITB Team

Minimum Software Specifications/Requirements

- **Support and Maintenance will be governed by SLA (Service Level Agreement)**
- **Software will be governed with SRS (Software Requirement Specifications) briefly given below**
- All critical transactions / operation which are being used to delete some records should be explicitly confirmed by the user with a prompted dialog box.
- The application should be designed and developed by incorporating security features as per the best industrial practices.
- The Application Software shall have appropriate administrative features / options for Users with role-based access to various features especially user management, role management etc.
- The Application Software should provide proper audit trail for any change made in the data.
- The software should be capable of storing the IP addresses, date and time stamp and other identities of the user modifying the information in the system.
- The system should maintain proper logs of any changes made in the data. System shall be implemented in such way that all critical transactions are stored with the logged-in user name that has performed that transaction.
- The Application Software should have provisions for proper validation checks to minimize data entry mistakes so that garbage data is not stored in the database.
- Application Software should ensure accuracy and consistency of data in database and reports.
- Attendance Management Software Should be compatible with any Payroll Management Software/Human Resource Management System
- Contractor may be required to integrate Attendance Management Software with Payroll Management and/Human Resource Management System

Web Portal (server side)

- Web based reporting will be essential part of the attendance system
 - Roster Management is a core component of this system and there must be an interface available for each location/facility and with access to focal person, who can update assign multiple shifts(Morning, Evening, Shifts) to enrolled staff
 - Vendor may be required to add complaint management system in web portal
- a. Responsibility Matrix/Access control
- Management of application user and usability rights. The access level can be segregated but not limited to in Admin access, Province wise access, District wise access, Tehsil wise access and Site/Health Facility wise access.

- b. **System should allow to define / create common settings like**
 - Country/Province/District/Tehsil/Town/UC/Area.
 - Hospital and its Category
 - Department's management.
 - Client/device (tabs) management.
 - Holidays
- c. **Attendance Management**
 - Working, off days and gazette holidays management.
 - Roster scheduling/management.
 - Leave Management.
 - Attendance Monitoring
 - Present / Absent / Leave / Late arrival / Early Exit/Field Visit
- d. **Basic Employee Profile**
 - Basic information.
 - Department management.
 - Category management.
 - Reporting/Replacement structure.
 - Transfer management of employee between locations and departments.
- e. **Duty Roster Management**
 - Assignment of shifts
 - Re-scheduling of shifts.
 - Single employee shift
 - Department and Employee category wise shifts
 - Provision for changing time of each shift
 - Provision of edit option to a particular shift (on call, off duty may be assigned as on duty)
- f. **Employee Enrolment on all Client Locations (BHU and RHC)**
 - Means nominated official stationed in BHU and/or RHC can enroll employee profile and also enroll finger impression for specific BHU and/or RHC on web portal using tablets rather than registering all employee by centralized administrator.
- g. **Synchronization**
 - Synchronization of employee related data (profile and roster) from server to client (scheduled and also on request from client).
 - Synchronization of employee attendance related data from client to server (scheduled and on request from server depending upon current live status of client device).
 - Synchronization of employee thumb impression from client device to server for a specific employee (this can be used in future while transferring the employee)
- h. **Biometric Enrolment on Client Side**
 - After searching an employee via employee code/CNIC, nominated official can enroll the finger impression of specific employee from a remote location.

i. **Reports**

- Time period wise attendance reports.
- Department wise attendance reports.
- Employee category wise attendance reports.
- Attendance type (present/absent/leave/late arrivals/early exit) wise reports.
- Shift wise reports
- Working hour's wise attendance reports & Attendance trends in tabular and excel form.
- Percentage of time spent in facility against for total working hours
- Segregation of Reports Province Wise/District Wise/Tehsil Wise/Health Facility Wise (Any/Multiple Selection/All)
- Inventory(Tablet & Portable Bio Metric Device and SIM) report of devices installed at each location including their status should be available on web portal

- Filters Required
 - District
 - Tehsil
 - Facility Type
 - Facility Name
 - Employee Category
 - Date Range
 - Any Other, if required at any time

Finger Print Device to Server Communication

- This can be done with an Android based application which will be receiving and sending data to server database. This application will be able to work in both online and offline mode.
- Device may also communicate directly with server with help of relevant API's and can store offline data locally.
- Offline mode: If due to any constraint the application/device is unable to connect to the server database then it will be storing the data in tablet's local memory/database. This stored data will be transferred to server database after establishing the successful connection with server.
