ITU PRODUCES JOB PROVIDERS NOT JOB SEEKERS- Dr. Umar Saif

Lahore, April 11, 2017

The Information Technology University (ITU) Punjab is producing job providers and not the job seekers. This was stated by Dr. Umar Saif the founding Vice Chancellor of ITU while addressing the ‘Open House’ here today, largely attended by the intending the students along with their guardians to get admission in undergraduate programs, which was followed by Q & A session.

Dr. Saif said that ITU Punjab has room for all those brilliant and bright students who face financial problems as 87 % of our students were getting scholarship under a comprehensive program while top 10 students were offered fellow scholarship. The ITU having world’s top class faculty, innovative courses and well equipped classrooms, labs, largest digital library in the Province and state of the art Lincoln Center differentiates it from other institutions, he added.

The ITU is offering Bachelor of Science online admissions for Computer Science and Electrical Engineering subjects on www.itu.edu.pk/admissions with a deadline of April 25, 2017 while test for admission will take place on April 30, 2017.
