

Press Release

Registration drive for ITU's Event "MakerFest" Lahore kicks off

Lahore, October 17, 2017

Registrations for MakerFest Lahore, organized by Information Technology University in collaboration with DIY Geeks. MakerFest Lahore are open, which is envisioned as a community-organized event that would showcase locally developed projects that draw inspiration from STEAM (Science, Technology, Engineering, Art, and Mathematics). Anyone who shares the passion for innovation and creativity can register latest by October 22, 2017 for the event as an attendee, startup or as a project.

The event is scheduled to take place on 28th October 2017 at Arfa Software Technology Park, Lahore for makers from all over Pakistan to show their contributions and learning. These makers could range from tech enthusiasts to crafters, homesteaders, scientists to garage thinkers. The aim of MakerFest Lahore is to provide a perfect platform for Makers to showcase their passionate innovations and to help the Makers in getting connected with leading local business community and investors from Pakistan to share, inspire and exchange ideas.

Along with the exhibit of innovative products, Makerfest Lahore would also include small curated events that are intended to bring more flavor to the event. By hosting the curated events, the Maker movement will gain footing in Lahore that shall give opportunity to host a similar events in the future. The event is organized by PlanX Technology Accelerator (A project of Punjab Information Technology Board (PITB) in collaboration with DIY Geeks, Makeistan, PITB, MIT Enterprise Forum Pakistan and Information Technology University (ITU).

Interested participants can register for Makerfest Lahore by the filling out the online forms as a startup, project or as an attendee before 22nd October 2017:
