The Tender shall have a minimum validity period of ninety (90) days from the last date for submission of the Tender. The Purchaser may solicit the Bidder’s consent to an extension of the validity period of the Tender. The request and the response thereto shall be made in writing. If the Bidder agrees to extension of validity period of the Tender, the validity period of the Bid Security shall also be suitably extended. The Bidder may refuse extension of validity period of the Tender, without forfeiting the Bid security.

17. **Modification / Withdrawal of the Tender**

17.1 The Bidder may, by written notice served on the Purchaser, modify or withdraw the Tender after submission of the Tender, prior to the deadline for submission of the Tender.

17.2 The Tender, withdrawn after the deadline for submission of the Tender and prior to the expiration of the period of the Tender validity, shall result in forfeiture of the Bid Security.

18. **Opening of the Tender**

18.1 Tenders (Technical Bids) shall be opened at 1230 hours on the last date of submission of bids i.e. **11th June, 2019**, in the presence of the Bidder(s) for which they shall ensure their
presence without further invitation, as per provision of Rule-30 of PPRA Rules, 2014. In case the last date of bid submission falls in / within the official holidays / weekends of the Purchaser, the last date for submission of the bids shall be the next working day.

18.2 The Bidder’s name, modifications, withdrawal, security, attendance of the Bidder and such other details as the Purchaser may, at its exclusive discretion, consider appropriate, shall be announced and recorded.

18.3 No Bidder or its representative will be allowed to keep any digital device (camera, audio recorder, cell phone etc.) during tender opening meeting at given time and location.

19. Clarification of the Tender

The Purchaser shall have the right, at his exclusive discretion, to require, in writing, further information or clarification of the Tender, from any or all the Bidder(s). No change in the price or substance of the Tender shall be sought, offered or permitted except as required to confirm the corrections of arithmetical errors discovered in the Tender. Acceptance of any such correction is sole discretion of the purchaser.

20. Determination of Responsiveness of the Bid (Tender)

20.1 The Purchaser shall determine the substantial responsiveness of the Tender to the Tender Document, prior to the Tender evaluation, on the basis of the contents of the Tender itself without recourse to extrinsic evidence. A substantially responsive Tender is one which:

20.1.1 meets the eligibility criteria given herein this tender document / the Goods / the Services;
20.1.2 meets the Technical Specifications for the Goods / the Services;
20.1.3 meets the delivery period / point for the Goods / the Services;
20.1.4 in compliance with the rate and limit of liquidated damages;
20.1.5 offers fixed price quotations for the Goods / the Services, whereby no optional offer / bid or price is allowed;
20.1.6 is accompanied by the required Bid Security as part of financial bid envelope;
20.1.7 The original receipt of tender fee submitted, attached with technical bid envelope.
20.1.8 In compliance with the Preparation/Submission of Tender in a manner prescribed in this tender document clause-13;
20.1.9 Conforms to all terms and conditions of the Tender Document, without material deviation or reservation.

20.2 A material deviation or reservation is one which affects the scope, quality or performance of the Services / Goods or limits the Purchaser’s rights or the Bidder’s obligations under the Contract.

20.3 The Tender determined as not substantially responsive shall not subsequently be made responsive by the Bidder by correction or withdrawal of the material deviation or reservation.

21. Correction of errors / Amendment of Tender

21.1 The Tender shall be checked for any arithmetic errors which shall be rectified, as follows:

21.1.1 If there is a discrepancy between the amount in figures and the amount in words for the Total Tender Price entered in the Tender Form, the amount which tallies with the Total Tender Price entered in the Price Schedule, shall govern.
21.1.2 If there is a discrepancy between the unit rate and the total price entered in the price Schedule, resulting from incorrect multiplication of the unit rate by the quantity, the unit rate as quoted shall govern and the total price shall be corrected, unless there is an obvious and gross misplacement of the decimal point in the unit
rate, in which case the total price as quoted shall govern and the unit rate shall be corrected.

21.1.3 If there is a discrepancy in the actual sum of the itemized total prices and the total tender price quoted in the Price Schedule, the actual sum of the itemized total prices shall govern.

21.2 The Tender price as determined after arithmetic corrections shall be termed as the Corrected Total Tender Price which shall be binding upon the Bidder.

21.3 Adjustment shall be based on corrected Tender Prices. The price determined after making such adjustments shall be termed as Evaluated Total Tender Price.

21.4 No credit shall be given for offering delivery period earlier than the specified period.

22. TECHNICAL EVALUATION CRITERIA

PASS MARKS: A technically eligible bidder, based on conditions listed in this document, not meeting the 70% pass marks limit will be rejected in Technical Evaluation, and its sealed/unopened Financial Proposal shall be returned back. All bidders scoring greater than or equal to 70% of the marks will be accepted in technical proposal, and their financial bids will be opened.

PROVISO: Provided that if NONE or ONLY ONE (single) bidder exceeds the 70% pass mark, then the Purchaser SHALL decrease the Pass Mark limit to 60%. In other words, if TWO or more bidders exceed 70%, then the Pass Mark will NOT be decreased to 60%. If Pass Marks are decreased to 60%, then ALL bidders with scores greater than or equal to 60% shall be considered EQUALLY as approved in the Technical Evaluation, and their Financial Bids shall be opened.

The Bidders who have duly complied with the Eligibility/Qualification and Evaluation Criteria will be eligible for further processing.
The Bids which do not conform to the Technical Specifications or Bid conditions or the Bids from the Bidders without adequate capabilities for supply and maintenance / warranty services will be rejected.
The technical proposals shall be evaluated by the technical evaluation committee in the light of following evaluation criteria:

ANNEXURE-A:

Technical Specifications of Maintenance Management System

WASA, LDA Manages various Mechanical (tube wells, disposal stations, dewater sets, gen sets etc.) and electrical equipment (Transformers etc.) A full fledge custom base Maintenance Management system is required for the said equipment. Android application and a web portal is required for this task. The requirements for the system is as under:

**Functional Requirements**

- The following Maintenance type should be available
  - Breakdown maintenance
  - Preventive maintenance
  - Corrective maintenance
  - Modification of equipment/assets
  - Annual shutdown maintenance
  - Planned maintenance
- Maintenance request for monitoring on system
- Maintenance request for tracking and replying
- Procurement & Store demand generation based on maintenance requirement
- Demand cancellation
- Reporting mechanism :
  - Daily
  - Emergency
  - Planned
  - Custom reports (these will be demanded by the purchaser from time to time as per need). This will not be charged as change request by the supplier.
  - Store wise repair & maintenance reports
  - Month wise total expenditure report
  - Accident report
  - Depreciation report
  - How many
    - How many fixed
    - How many not fixed
    - How many attended
    - How many reported
  - Who
    - Who reported
    - Who fixed
    - Who assigned
  - Where (location)
  - How
    - Part changed
    - Maintenance done
    - General clean up
    - Overhauling
  - Which equipment used
  - Cost
- Vehicle movement system
  - Initiator should have the rights to view the total allocation, already used & remaining balance of allocated petrol
- How many demands were initiated the specific time for particular vehicle?
- Review the details of any particular visit i.e.
  - Date
  - Time
  - Driver
  - Vehicle used
  - Destination etc.
- Maintenance task list for the users.
- Store activities to be performed, in the form of maintenance task lists
- Define the extent of preventive maintenance and inspection work and when it should be performed at pieces of equipment and functional locations
- Define the frequency of recurring maintenance and service tasks, either:
  - Time-based or counter-based preventive maintenance
- Define the cost-based assignment of preventive maintenance and inspection activities from the start
- Make a cost preview of preventive maintenance and inspection work to be performed in the future
- Split-Level Maintenance
- User should be able to create a maintenance plan, and consequently also the maintenance call objects, for example, at the following levels:
  - Pieces of equipment
  - Functional locations
  - Materials
  - Materials & serials numbers
  - Assemblies
  - Execution of maintenance tasks
  - Completion of maintenance tasks
- When user enter a notification for a maintenance object, the system automatically copies all the relevant object data (for example, installation location cost center).
- User can use maintenance notifications as the basis for creating maintenance orders, in order to:
  - Plan tasks in detail
    - Location of the task
    - Time of issue logged
    - TAT
    - Type of the task
    - What actions to be performed
    - Details of equipment involved
    - Travel
    - Environmental conditions
    - Social political conditions
    - Resolution time
    - Total time
    - Other parties’ involvement details
    - Task assignment details
    - User details
  - Track work progress
- When planning concrete tasks in maintenance order, user can make reference to several notification orders.
- Follow-up tasks can result from maintenance notifications, such as printing a certain paper or initiating a workflow.
- When a maintenance notification is technically completed, its data is entered in the maintenance history.
Application Requirement

Note: WO = maintenance order or work order

- The application should provide functionality to capture the equipment number or the functional location code based on scanning the tagged barcode on the equipment or the functional location.
- Application should have proper escalation mechanism for notifications where the user can create Maintenance notification to notify the responsible person about any failure discovered on the facilities/equipment.
- After creating the notification the application will send email, Push notification & SMS (discretion of purchaser on what services to include) to the responsible person to handle the work order process.
- Change and display maintenance notifications.
- Display the N latest created notifications for the same location/equipment with reference to the maintenance function type (codes and catalogues).
- Updating the notification status.
- Upon raising the Work Order, the assigned responsible person should receive a notification on the mobile device, which includes the facility and equipment details.
- Application should have a planner utility with which all activities should be planned or scheduled for
  - Timetable for future unplanned activities
  - Planner for scheduled activities
- Configuration panel
  - User management
  - Duty roster management
  - Privilege management
  - Activity management
  - Audit log management
  - Notification management
  - Escalation management
  - Work order creation management
- Dashboard, listings, reports and
  - Work order listings
    - Individual work order details
      - Time details
      - Location details (GIS coordinates)
      - Equipment details
      - Equipment cost details
      - Type of work order details
      - Work order owner details
      - Work order initiator details
      - User assigned
      - TAT defined
      - User travel time details
      - User expense details
    - User listings
    - User -> work order mapping
    - User activity log
    - User performance measures
    - User time management
- Escalation matrix
  - The application should provide option to display list of the assigned Work Order to specific employee or work center.
  - The application should provide option to list the opened maintenance orders's for specific facility (functional location) or for specific equipment.
  - The application should be able to capture the travel time based on the user status of the maintenance orders and the GIS coordinate of the facilities / Functional locations.
  - The actual working hours (per WO) for each resource need to be stored in system.
  - To have option on the application’s configuration to enforce the user to scan the functional location’s / equipment’s barcode or to write it manually.
  - The application should work in online and offline mode, all the data have to be synchronized with core system.
  - Option to create Material requests to Store or procurement department.
  - The security standards and methods have to be considered on all the mobile applications.
  - All the applications should be compatible with the defined roles and authorizations with base system.

SERVICE LEVEL AGREEMENT FOR
<Type of Service>
BETWEEN THE <Party A>
AND
<Party B>
Confidentiality Statement

<Party A> is the Customer requesting the Services mentioned in the SLA.

<Party B> is the Service Provider.

This document contains confidential and proprietary information of the <Party A> and <Party B>, which must be kept confidential. Duplication or use other than for evaluation purposes in connection with negotiating and implementing a definitive written agreement for the provision of application maintenance outsourcing services is strictly prohibited. This document must be returned to the <PARTY A> in the event such an agreement is not enacted.

Parties and Timeline

This service level agreement is between <Party B> and the <PARTY A> from <Start Date (YYYY-MM-DD)> to <End Date (YYYY-MM-DD)>.

- This service level agreement is effective as of the date of the signatures below. The <PARTY A> and <Party B> shall review the contract on quarterly based to determine if any modifications or amendments are needed to reflect the <PARTY A>’s support requirements and <Party B>’s services.

- The purpose of this service level agreement is to document the service delivery of <Party B> to the <PARTY A>. <Party B> shall deliver the services set forth in this document. The <PARTY A> shall pay for the services covered by this agreement.

Service Catalogue

<Party B> will provide the following services to the <PARTY A>:

<table>
<thead>
<tr>
<th>Service</th>
<th>Description</th>
<th>Examples</th>
</tr>
</thead>
</table>
| User Support          | Receive, document, and prioritize issue tickets and help <PARTY A> staff in the use of existing applications or services. | • Provide help desk support  
• Answer queries about applications.  
• Receive and document bug reports.  
• Collect and document requests for changes.  
• Share status of requests. |
| Problem Correction    | Bring an application back to its original functionality before the problem arose. This may include a permanent fix or a temporary work | • Fix bugs.  
• Retrieve functionality after abnormal program terminations.  
• Complete root cause analysis. |
| **Application Enhancement** | Modify the functionality of an existing application. | • Apply new functionality.  
• Fulfil regulatory requirements.  
• Enhance run-time efficiency.  
• Modify applications based on new releases of hardware or software. |
|-----------------------------|---------------------------------------------------|----------------------------------------------------------------------------------|
| **Process and Application Improvement** | Assist *PARTY A* in planning the better use of applications to meet business strategy and goals. This is a proactive attempt by *PARTY B* to improve applications and processes, based on *PARTY B*'s increased application and business knowledge over time. | • Help *PARTY A* staff to make strategic decisions that meet business goals.  
• Provide functional, architectural and process improvements as required for the support and maintenance of the system areas in scope. |
| **<Other Services>** | | |

**Reporting**

The following processes will be used in order to manage the application maintenance outsourcing agreement:

**Monthly Status Report**

*PARTY B* to provide the *PARTY A* with a Monthly status report that gives an overall summary of the following:

- Project health
- On-going activities
- Completed tasks
- Upcoming milestones and releases
- Bug fixes
- Risk identification and mitigation plan
- Action items across different application areas

**Monthly Review Meeting**

Metrics will be tracked by *PARTY B*, summarized in a dashboard format, and discussed in a monthly meeting. This activity includes the following:

- Tracking unresolved issues from maintenance projects which impact the SLA
- Updating maintenance project progress and resolving critical issues
- Capturing agreements and disagreements and items needing escalation
Quarterly Review Meeting

A quarterly review meeting will include the following:

- The SLA will be reviewed with the IS managers involved and an amendment addendum will be created if required
- Review document prepared by <Party B> will include overall project status, issues list, metrics reporting, supporting reasons for metrics deviation, and items that need adjustment within SLA (e.g. scope, metrics, etc.)
- SLA changes will be tracked by version number and date

User Support and Problem Correction

The following procedures will be used to respond to problems that are received by the help desk. A problem is defined as an unplanned system event which adversely affects application processing or application deliverables.

Measurement period for User Support and Problem Correction SLAs is a calendar month. For example, if the SLA is not met during any particular month, deduction of one penalty will be applied to the invoice for only that month at the end of SLA.

Prioritization Approach

Service requests for problems received by the help desk will be given a Severity Code from 1 – 4 based on how important responding to the problem is to the primary business of <PARTY A> as a whole, as well as the availability of workarounds. The Severity Code will be the basis for scheduling work on the backlog and assigning resources to the request. Critical, important, and supportive application functions are defined in the section below on Application Function Type, with a complete list of application functions included in this agreement listed in Appendix A.

<table>
<thead>
<tr>
<th>Severity Code</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>A problem has made a critical application function unusable or unavailable and no workaround exists.</td>
</tr>
<tr>
<td>2</td>
<td>A problem has made a critical application function unusable or unavailable but a workaround exists. or</td>
</tr>
<tr>
<td></td>
<td>A problem has made an important application function unusable or unavailable and no workaround exists.</td>
</tr>
</tbody>
</table>
A problem has diminished critical or important application functionality or performance but the functionality still performs as specified in the user documentation.

A problem has diminished supportive application functionality or performance.

**Application Function Type**

The table below provides a brief definition of critical, important, and supportive application functions. See Appendix A for a complete list of the application functions included in this agreement.

<table>
<thead>
<tr>
<th>Application Function Type</th>
<th>Description</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical</td>
<td>These application functions are critical to ensuring project efficiency or <code>&lt;PARTY A&gt;</code> reputation. Extended failure will impact profit or damage <code>&lt;PARTY A&gt;</code> reputation.</td>
<td><code>&lt;Add functions as necessary...&gt;</code></td>
</tr>
<tr>
<td>Important</td>
<td>These application functions are important to business productivity, but are not critical to profitability or <code>&lt;PARTY A&gt;</code> reputation.</td>
<td><code>&lt;Add functions as necessary...&gt;</code></td>
</tr>
<tr>
<td>Supportive</td>
<td>These applications support productivity, but are not essential to business effectiveness.</td>
<td><code>&lt;Add functions as necessary...&gt;</code></td>
</tr>
</tbody>
</table>

**Response and Resolution Times**

Severity codes are used in order to determine appropriate response and resolution times. Response and resolution times are measured from when the incident is opened by the help desk. If the problem is not resolved within the defined timeframe, continuous effort will be applied until the problem is resolved.

</tr>
</tbody>
</table>
Application Enhancement

Application enhancement projects involve functional enhancements made to a properly working application to accommodate new or changed user requirements. Examples include increasing an application’s performance, enhancing a user interface, or optimizing code.

Application enhancements can be requested by the <PARTY A> or proposed by <Party B>. The <PARTY A> will prioritize the order in which enhancements are performed.

Project Management

<Party B> is expected to manage application enhancement projects in a structured, organized, and cost effective manner.

- Measurement period for Project Management SLAs is either the entire project span or the milestone completion span.

**Project Management Service Levels**

</tr>
</tbody>
</table>

Software Quality

<Party B> will apply appropriate process and practices in order to deliver high quality software to the <PARTY A> containing as few defects as is practical. Defects can include the following:

- Software bugs (e.g. errors or faults in source code or design that cause an application to produce an unexpected result).
Software that is made up of working code but does not meet the initial requirements laid out by the <PARTY A> and described in the functional specifications.

**Process and Application Improvement**

<Party B> will help the <PARTY A> to improve its applications and application maintenance processes over time, in line with the <PARTY A>’s business goals and strategy. As <Party B> gains increased application and business knowledge, it is expected that <Party B> will help the <PARTY A> to plan the better use of applications to meet business goals.

There are no SLAs associated with Process and Application Improvement.

**Signatures**

<Party B> and the <PARTY A> agree to the service levels and terms outlined in this agreement.
