54.6 If the Contractor questions any decision or instruction of the Authorized Representative of the Purchaser / the Client, the Contractor may refer the matter to the Purchaser / the Client who shall confirm, reverse or vary such decision or instruction.

55. Waiver

Failure of either party to insist upon strict performance of the obligations of the other party, under the Contract, shall in no way be deemed or construed to affect in any way the right of that party to require such performance.

56. Documentation

The Contractor shall furnish the user documentation, the operation manuals, and service manuals for each appropriate unit of the supplied Services, and other information pertaining to the performance of the Services, in hard copy format, in soft copy format and in the form of on-line help, before the Services are taken over by the Purchaser.

ANNEXURE-A

SCOPE OF SERVICES & SPECIFICATIONS

Introduction

The Government of the Punjab is seeking to extend healthcare facility through Telemedicine for people of remote areas. This will be in absolute benefit of population for their Basic and Primary Urgent Care through a doctor available online. The travel cost will be reduced and patients could be able to get healthcare at their doorstep through telemedicine. This is a progressive step for those who are unable to go out for their checkup either they are senior citizens, disable persons or due to any other reason.

The devised telemedicine framework will also benefit the doctors/general practitioners to get appointed for a consultation session through video/audio and other electronic communication ways to reach-out to their patients who need urgent care.

With power of technology, the project will assist key stakeholders and beneficiaries including:

i. Delineated regulators, purchasers, and doctors of health services like doctors, laboratories and pharmacies
ii. Unemployed and lady doctors who are not working anywhere
iii. Stimulating the demand side to provoke changes in doctor/supplier behavior
iv. Accountability for performance through contractual mechanisms
v. Channeling resources directly to the demand side to obtain health goods and services

Mera Doctor Framework

The Program is aimed at providing urgent basic and primary healthcare services to the citizens of Punjab. The Government of the Punjab has elected to implement the Program and to provide basic and primary healthcare services through a framework.

As this is a public expenditure for the benefit of the citizens of Punjab Province, the Government of Punjab has given mandate to Punjab IT Board to prudently manage the Program's finances through:

i. Technology infrastructure and vendor provisioning
ii. Patient registration
iii. Doctor onboarding via credentials authentication through PMDC
iv. Management of consultations through managed appointment schedules regulations per doctor, time-slots and controlled appointment hours per day
v. Distribution of consultation and technology platform fee through authorized consultations based on quality checks and public ratings
vi. Public pharmacies and laboratories onboarding, service delivery checks and electronically managed prescriptions and orders

A well-crafted Premium software platform and policies are devised in the framework to protect all the key players and stakeholders.

Login with Mera Doctor
Mera Doctor app/web portal login screen should allow patients to log in to access online care services using a set username and password.

View and Search Doctors
The system should allow patients to view a list of registered and verified doctors along with their profile information. Patients should be able to search and filter the doctor by district, tehsil, specialty, and physician gender. Patients should be able to add doctors to their favorite list for future consultations.

Submit Appointment Request
Patients should be able to book an online consultation with a doctor by choosing a slot from the given day schedule.

Upload Supporting Documents
The system should provide a user-friendly interface for the patients to upload supporting documents.

Join Telemedicine Appointment with Doctor
The system should provide a reliable Telemedicine platform for online video conferencing appointments with the doctor. The telemedicine module should offer all standard features such as audio, video, screen sharing, and Instant messaging. The system should provide the facility to record the audio and video of the tele clinic encounter for future reference and recording.
Appointments booked by the patients should be available under my appointments section to connect with the doctor and for their records. The system should maintain the appointment statuses to allow patients to filter their appointments accordingly. The system should record orders, results, and prescriptions, communications by the doctors against an appointment.

Vital Signs
The patient should be able to add their blood pressure, temperature, respiratory rate, SP02, pulse rate, blood sugar level, height, and weight taken from any digital device for the doctor to view. It would be an added benefit for the patients if the system could provide a connected digital device mechanism to add and sync vitals. In absence of any such digital device, or patient cannot take vitals at its own, then doctor should be able to add vital signs for the patient.

Send and Receive Communications
The system should provide a highly specialized and secure patient communication portal for empowering patient engagement directly with the doctor. The patients should be able to send and receive documents and audio-video messages to the doctor.

View My Prescription
The section will available to patients to view their complete prescription with symptoms, diagnosis and medication/investigation orders.

View My Results
The system should provide a consolidated section to the patient to view and download all diagnostic results in one single place, entered by doctor or respective service provider.

My Orders
The system should provide a separate section for the patients to manage medicine, lab and radiology imaging orders. The system should display all orders placed by the doctor from the EHR directly under the “My Orders” section of the patient portal, where patients can access them and visually track results. It will be at patient’s discretion to select nearby pharmacy or laboratory to send orders and receive results/medicines manually or off-the-app communication.

Notifications, Alerts & Reminders

The system should provide delivery of event-based notifications and alerts to the patient via email and SMS to track the status of different activities that engage patients. The system should allow patients to set customized reminders against appointments and also will enable them to set recurring reminders against appointments. The system should generate automatic notifications on new orders and prescriptions received at the patient portal, new communication received under the patient communication section, and results received against processed orders.

Doctor's Portal

Doctor Registration

The system should enable doctors to register to provide telehealth services to patients. The registration form should cover the following fields to register a doctor. Once a doctor is successfully registered, a verification request should be available in the admin console of the Mera Doctor. Upon approval of the request, doctors should receive the portal login information in their email and SMS.

- Doctor's Full Name
- Father/Husband Name
- Gender
- CNIC
- Email
- Mobile Number
- Date of Birth
- Age
- Marital Status (Single, Married, Widowed, Divorced, Separated)
- Province
- District
- Tehsil
- Address
- Specialty
- Sub-Specialty
- PMDC Registration (Active / Inactive)
- Current Posting
- Native Language (Urdu/Punjabi/Saraiki)

Doctor Login

Mera Doctor login should exclusively cover the critical roles for practice management, including doctors, medical assistants, and receptionists. It should have workflows for the clinical encounters, standard EMR features, appointments & scheduling, a telemedicine platform, a referral management solution, and other specialized features specific to cater needs of the doctors. The complete feature list for the doctors at the Mera Doctor doctor's portal is described in below sections.

Manage Patients List

The portal should provide a user-friendly interface for the doctors to manage the patients' list. It should enable doctors to manage patients' appointments, send SMS and create orders against the patient.

Manage Patient Accounts and Demographics

The system should provide the facility to the doctors to manage patient accounts and demographics in a separate section where they should be able to manage patient insurance details, demographics, contacts, and emergency contacts and create Face-sheets for preview, download, and print.

Manage Appointments Calendar

The system should provide an interactive interface for the doctors to manage their appointments calendar. It should encompass a comprehensive Practice Management Solution (PMS) to automate the appointments and scheduling processes and directly connects patients with the doctors through the patient portal. It should contain an appointments dashboard that should provide an interface to access and join the current online appointments directly. The doctors should be able to update the appointment status and reschedule or cancel the appointment.

Manage Doctor Profile

The system should allow doctors to manage their profiles, which will be displayed on the Mera doctor patient portal. Each profile should include name, picture, specialization, PMDC Letter, qualification & education, board certifications, areas of interest, conditions treated & procedures performed, affiliations / memberships / accreditations and a profile summary.

Manage Doctor Schedule
The system should allow doctors to create and manage periodic schedules and appointments calendar. The pre-defined schedule will be displayed on the Mera Doctor patient portal for online appointment booking. The system should limit each day's schedule of the doctor to the policy requirement of administration. The limit feature should be in admin console.

Manage Structured Data of Patient EMR
The system should allow doctors to add patient data in a structured format consisting of past medical history, surgical and procedural history, family history, social history, psychological history, allergies, medications, vital signs, problem list & diagnosis, immunizations, lab results, and radiology results.

Manage Visits, Clinical Notes, and Patient EMR
The system should provide a physician-centric simplified clinical module to the doctors for managing visits, clinical notes, and patient charts. The doctors should be able to view and manage visits on a single screen and enable easy navigation for the doctor to access visit history, structured data forms, and progress notes. The doctors should be able to download and print visit summaries, send prescription notes and visit summaries at the patient portal, and e-fax summary notes to different consultants.

Manage Patient Case reports for Referrals and Transition of Care
The system should provide a highly specialized platform for achieving and managing the transition of care through digital case referrals directly from the system. The doctors should be able to generate a customized condensed case report of the patient by pulling information and making selections from the existing medical record, supporting documents, results, and historical case reports. The doctors should be able to share case reports with internal doctors, external consultants, and friends and family members. The system should keep track of the communications, follow-up notes, and recommendations given by different doctors and consultants on a particular patient case.

Manage Telemedicine Appointments
The system should automatically assign a specialized meeting organizer role to the doctor to conduct a telemedicine appointment with a patient. Providers should be able to start a scheduled telemedicine appointment with the patients from the appointments calendar.

Send Orders to Patients using e-Prescription.
The system should allow doctors to prescribe medications to the patients and send the e-prescription via email and text message to the patient. The medications instruction in the prescription slip should be in URDU.

Manage Tasks
The system should generate auto tasks for the doctors when the patients have uploaded the results for review and communication.

Send and Receive Patient Communications
The system should allow doctors to send and receive communications using the patient communications module central to both patient and practice. The patient communication section should form a timeline of requests and responses between patient and practice organized in a structured format. The communications include sending text messages, documents, video recommendations, video links, and any other patient education material specifically for the patients.

Set and Receive Reminders, Alerts, and Notifications
The system should allow doctors to set customized reminders against the appointments and assigned tasks. The system should generate automated alerts and notifications upon the occurrence of specific events, such as receiving lab results.

Data Privacy and Security
The system should ensure patients' data privacy and security which must comply with health department rules and regulations.

HEALTHCARE STANDARDS COMPLIANCE
The Mera Doctor app should comply with International Healthcare Standards including standard diagnosis classifications ICD-10/ICD-11, SOAP, LIS & RIS Standards. The app and portal must comply with patient's EMR privacy in data exchange & transmission.

PATIENT APPLICATION (ANDROID/IOS)
The patient level portal requirements, as mentioned above, shall be required for Mobile applications as well.

PROVIDER (DOCTOR) APPLICATION (ANDROID/IOS)
The doctor level portal requirements, as mentioned above, shall be required for Mobile applications as well.

WHITE-LABELLING (ANDROID/IOS)
The product shall be fully white-labelled with a restriction on commercial advertisements and other brandings of any sort.

The Recipient agrees to hold the Confidential Information in strict confidence and shall not disclose such information to any third party without the written permission of the Discloser. The Recipient also agrees to employ all steps necessary to protect the Confidential Information from unauthorized disclosure or use, including without limitation, all steps the Recipient uses to protect information they consider proprietary and a trade secret.

The Recipient shall refrain from directly or indirectly acquiring any interest in, or designing, creating, manufacturing, selling or otherwise dealing with any item or product containing the Confidential Information received by Recipient under this agreement.

Neither party of this Agreement may assign this Agreement or any rights or obligations under it, without prior written consent by both parties, and any attempt to do so is void; and neither grants the other any licenses under any patents or copyrights.

The Discloser provides the Confidential Information on an AS IS basis and is not responsible for any damages arising out of the use of the Confidential Information made available under this agreement.

This agreement shall be governed by and construed in accordance with the laws of the Islamic Republic of Pakistan, and any applicable law.
